Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Applicant's amendment filed August 31, 2007 have been fully considered but they are not persuasive due to a new prior art that has been applied against the claim invention as below.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 26 is rejected under 35 U.S.C. 102(e) as being anticipated by Kamoi et al. (US Pub. 2004/0183473).

Kamoi discloses a discharge lamp lighting control device, comprising:
a power factor improving power converter (20, 30) that includes a switching device (22, 31) utilized to produce a predetermined DC voltage (V1);

a polarity reversing circuit (40) having a plurality of switching elements (41-44) that are switched ON/OFF to control an operation of a lamp (L);
a starter circuit (90) that functions to ignite the lamp; and
a controller (23, 60, 48) that controls said switching device (22, 31) of said power factor improving power converter and said plurality of switching elements (41-44) of said polarity reversing circuit (40), wherein only said switching device of said power factor improving power converter (20, 30) operates at a high frequency rate when said lamp is operating in a lighting state.

Allowable Subject Matter

3. Claims 1-25 and 27 are allowed.
4. The statement of reasons for the indication of allowable subject matter has been provided in the previous action.

Response to Amendment

In the remarks section of Amendment filed August 31, 2007, page 7 regarding to claim 26, Applicant alleged that the "only said switching device of said power factor improving power converter operates at a high frequency rate when said lamp is operating in a lighting state and believe that KAMOI et al. indicates that switches 41 and 44 are turned on and off at a tow/high frequency in an alternating fashion with

switches 42 and 43. The term "high" or "low" is not really defined unless being supported by a numerical value. Therefore, the "low" frequency operated via switches in Kamo does not reflect a real scale or standard measurement of a high or low frequency high value as compared by the applicant.

For the above reason, the rejection 102 applied toward claim 26 is still remained in this office action.

Correspondence

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
